-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

See page 1, lines 19 and 22. Dangling sentence structure.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Fernandez et al., US 6,697,103.

Re claim 1, a method for determining the relative occupancy of a space via analysis of a video stream. Fernandez et al clearly discloses this aspect. See col. 1, line 66 to col. 2, line 48, col. 3, line 58 to col. 4, line 34, col. 4, lines 57-67, col. 5, lines 1-21, col. 6, line 59 to col. 7, line 6, col. 15, lines 18-41, col. 16, lines 8-31 and lines 52-67. Note that in these cited segments, the mere fact that video surveillance conducted over the internet of various locations is indicative of determining the relative occupancy of a space via analysis of a video stream. One example disclosed in these cited segments is monitoring the density of objects at facilities outfitted for video surveillance.

Re claim 2, the method of claim 1, wherein the space is one of a restaurant, a nightclub, a bar, a highway, a freeway, a beach, a tunnel, a bridge, or a public park.
See col. 2, lines 11-21, col. 4, lines 3-10.

Re claim 3, Fernandez discloses a computer system for determining the relative occupancy of a space (figs. 1-3, also with reference to claim 1 above) comprising: a network computer system (5) connected to the internet (8, col. 2, lines 27+) and comprising a connection to or having connected thereto a graphics card for capturing a video stream (graphic card is inherent in server 5), a camera for providing said video stream (3, col. 4, lines 23+), a software program for analyzing said video stream and determining a baseline image or sequence of images thereby providing relative occupancy information (66, 166, col. 8, lines 20+), an internet location for providing said relative occupancy information to the public (see claim 1 above, also col. 2, lines 11+, col. 4, lines 3+).
